Ktec and Conexa Partnership Agreement

Ktec and Conexa Partnership Agreement – Announcement

Kuantech Corporation (Ktec), a global power supply manufacturer and Conexa Tech Solutions Ltd (Conexa), a power supply and technology provider, with offices in the UK and India, are pleased to announce a new partnership agreement. Covering the dynamic UK and India regions, this agreement introduces Ktec's versatile product range and OEM capabilities to these areas, bolstered by local commercial and technical support.

Manufacturing from a fully quality accredited, purpose-built, 1 Million square metre facility in Cambodia Ktec have a total of 210 vertically integrated production lines covering SMT, plastic injection, wound components and cables. In developing the factory Ktec have paid particular attention to sustainability with 40% of factory power coming from an on-site Solar farm and plans to increase this to 60% in the near future.

Ktec's standard product offering covers a wide range of applications including Consumer Products, IT, Battery Chargers, Personal Care and Micro-Mobility, Medical & Measurement, Industrial and LED drivers. In addition Ktec works with a large number of household names in producing consumer product power supplies and can undertake full power supply design to customer requirements.

With a collaborative approach, extensive technical expertise and proven success in assisting its customer base with power supply selection, design and application Conexa is well-equipped with this partnership to enrich its portfolio and capabilities in servicing its client base.

Speaking about this agreement, **Marc Hogg (Conexa CTO)** said *"The opportunity to work with a global leader in power supply manufacturing with sustainability as a key cornerstone is right inline with our own corporate aims and we are excited to see what the future brings."*

Tai Cheng Ktec's VP of sales added *"We are excited to be working with Conexa whose experience and technical capabilities are a great match for us and will enhance our market reach."*
