ME1D Series

1W, Unregulated Single or Dual Output, 1.5KV Isolation, DIP14 Package DC/DC

Features

- Rated power: 1W Max
- Input voltage range ±10%
- Unregulated single or dual output
- High efficiency, up to 89%
- Small no load input current
- Isolation voltage 1.5KVDC
- Operating temperature range: -40 ~ +105°C ambient
- RoHS compliant
- Standard DIP14 package
- Continuous short circuit protection
- Designed to meet UL/EN/IEC 62368-1
- 3 year warranty

Overview

The ME1D series are DIP14 package DC/DC converters with unregulated single or dual output, and 1.5KVDC isolation. These converters feature high efficiency, low ripple and noise, continuous short circuit protection, and wide operating temperature range. They are widely used in distributed power system in industrial applications where isolation and voltage converting is needed.

* Only typical models are listed. Other models may be available upon request.

* For dual output models, max capacitive load stipulated in the above list is for each output.

* See MEK1D series for 3KVDC isolation models.

Electrical Specifications

Unless otherwise indicated, specifications are measured at T_A=25°C, nominal input voltage, full load after warm up.

Output short circuit protection		Continuous, automatic recovery				
Input filter		Capacitor				
Hot plug		None				

* Operating with less than 10% of rated load will not cause permanent damage to the converters, but the performances data may not fall into the specifications, and reliable operating is not assured.

* Dual output models need to operate with balanced load. The load difference between two outputs over 10% may cause unstable operating of the converter.

Note

*Typical application circuit is to further lower the input and output ripple. It is not required for general use.

*Recommended component specifications are typical values. Excessive external capacitive load may cause startup problem.
